

Update an Existing Practitioner Listing

Beginner checklist v1.1 | Live website | Recommended staff role: **Editor**

1 Before you edit

- ☐ Sign in at rebekahspureliving.com/wp-admin.
- ☐ Confirm you are on the live domain, not a future staging site.
- ☐ Use your own Editor or Administrator account.
- ☐ Gather approved name, credentials, practice, category, description, and public contact details.

2 Open the correct record

- ☐ Select **Medical Practitioners** in the left menu.
- ☐ Select **All Medical Practitioners**.
- ☐ Search for the person when needed.
- ☐ Hover over the correct row and select **Edit**.
- ☐ Do not use Quick Edit, Trash, or Clear Cache yet.

3 Edit approved fields only

- ☐ Open **Medical Practitioner Fields**. If hidden, select Meta Boxes and use Drag to resize.
- ☐ Medical Service: approved category or categories only.
- ☐ Medical Center: public practice name.
- ☐ Full Name: public name and credentials.
- ☐ Description and Contact Info: select **Visual** first.

4 Review and save

- ☐ Check spelling, credentials, categories, first and last description lines, and every link.
- ☐ Do not change the page address, SEO settings, code, or unrelated controls.
- ☐ Select the blue **Save** button once.
- ☐ Wait for the saved confirmation before leaving.

5 Clear the applicable cache

- ☐ Return to All Medical Practitioners.
- ☐ Hover over the updated row and select its **Clear Cache** action.
- ☐ Do not use Purge All Cache, Purge Varnish, or another server-wide control unless the cache lesson directs you.

6 Verify the public result

- ☐ Open rebekahspureliving.com/practitioners/ with nothing added after the slash.
- ☐ Search for the person and check the card.
- ☐ Select View full listing and check all details and links.
- ☐ Repeat the check on a phone or narrow browser width.

STOP AND CONTACT BLUE NOVA

Stop before saving if the category is missing, a requested field is unclear, WordPress shows an error, the old information remains after clearing the record cache, the layout breaks, or a public link does not work.

SAVE > CLEAR THE APPLICABLE CACHE > VERIFY THE EXACT PUBLIC PAGE ON DESKTOP AND PHONE
